Date: September 6, 1984

ATHLETIC EQUIPMENT NO. 7

To: Manufacturers of Racquet Sports Eye Protectors; The CSA Technical Committee on Racquet Sports Eye Protection; The Committee on Sports and Recreational Equipment; The Canadian Racquet Ball Association

Subject: Postponement of Effective Date for Compliance with Requirements of CSA Preliminary Standard P400-M1982 "Racquet Sports Eye Protection"

On November 1, 1983 the Canadian Standards Association announced a Certification Program for Racquet Sports Eye Protectors.

This program was brought about by concern over the increasing number of serious eye injuries suffered by squash and racquet ball players, many of whom were wearing racquet sports eye protectors.

We have been advised that because of a problem which has developed with regards to the interpretation of the impact test specified in the subject standard, the date of September 9, 1984 on which a list of certified manufacturers was to have been released is now postponed.

CSA anticipates that the recommendations by the Technical Committee should be received in time, so that the list of certified manufacturers can be released on or about February 8, 1985.
