Announcing: Withdrawal of Technical Information Letter No. A-17

Class No: 4413 02 : OUTLET BOXES AND FITTINGS - Plates and Covers

Who is affected?

Manufacturers of flush device cover plates

What do you do?

1. This publication outlines certification revisions that do not affect your currently certified product designs, unless your product has been certified to the requirements of T.I.L. A-17.
2. Please contact CSA engineering staff if you have questions or need information concerning this publication and how it applies to you.
3. If you would like to arrange for an evaluation of new products to the revisions, initiate a certification project by contacting our Client Services Centre at 1-866-797-4272. Please supply appropriate supporting documentation*. If testing is needed, we will inform you of the samples required.

*Technical information as well as company name, address, factory locations and CSA file number or master contract number (if assigned) when applying.

Introduction:

At the January 16, 2007 meeting of the Integrated Committee on Wiring Devices, the Committee re-affirmed the decision made by the relevant CSA Subcommittee and the relevant CSA Technical Committee (TCWP) to reject the Technical Information Letter (T.I.L.) No. A-17 dated January 6, 1992 for cover plates.

Background and Rationale:

In accordance with Clause 4.5.8 of Standards Council of Canada document CAN-P-1500L, Additional Requirements for Accreditation of Certification Bodies, published in January 2006, the Certification Body issuing Other Recognized Document or ORD (such as a T.I.L.) that has been formally rejected by the appropriate standards development committee shall cease all certifications of products based on that ORD and remove the product listings from its product directory.

This document confirms that CSA International is formally withdrawing TIL No. A-17.
