

COMPANY OVERVIEW

Description

CSA Group Leyland has unrivalled experience supporting OEMs, Tier 1s and their supply chain in the transportation sector, whether it be from component level up to full vehicle and beyond. Opening its doors originally as an OEM test facility, CSA Group Leyland has expanded, growing into the dynamic test facility it is today. The engineering team has a detailed understanding of designing and building bespoke test rigs and developing test procedures on an individual basis, or alternatively working to OEM, national and international standards.

With CSA Group's global market access, we can now confidently support our clients around the world.

Our large scale test facility has developed over time to support testing and development in the latest technologies associated with lightweight vehicle structures, advanced driveline systems, premium interiors and connected vehicles.

If you would like to discuss your testing requirements in more detail with a member of the sales team and some technical support then please contact us on: **+44 (0) 1772 411 922** or **ukinfo@csagroup.org**
