PLASTIC PIPE CERTIFICATION
NOTICE NO. 23

TO: Manufacturers of Plastic Pipe, Fittings and Solvent Cements, And Others Interested

SUBJECT: CSA Certification Service for Plastic Underground Power Cable Ducting

The Canadian Standards Association is pleased to announce the availability of a certification service for plastic power cable ducting intended for use underground. The basis for CSA Certification will be CSA Standard B196.1 which has been prepared and accepted by the relevant committees and is now being prepared for printing as a CSA Standard.

For details regarding certification of raw materials for use as plastic ducting, are covered in CSA Plastic Pipe Certification Notice Number 12.

Surveillance:
Manufacturers participating under this service will be required to maintain suitable records to be made available to CSA Inspectors on request. Inspection and/or test may be carried out at any time on production lots or stocks of all pipe for which certification has been granted and to which the certification marking "Certified - (SA) -Certifie" is, or is intended to be applied.

Charges:
Charges for initial product evaluation and for processing certification reports etc. will be billed on a time-cost basis. Costs for servicing certification agreements including periodic in-plant inspections and re-test are also charged on a time-cost basis. Refer also to Notice 22.

Manufacturers wishing to obtain additional information and/or application forms, please submit full details to CSA's Applications and Records Group, 178 Rexdale Boulevard, Rexdale, Ontario.

This service is effective immediately.
