In recognition of exceptional contributions, distinguished leadership, and unyielding advocacy for the development of standards for plumbing, fuels, and transportation.

For over a decade, Sidney Manning has been an exceptional member and Chair of numerous CSA committees. He has contributed to the development of standards and installation codes for natural gas vehicles, natural gas and propane appliances, propane storage and handling, propane fuel systems and containers on motor vehicles, biogas generation and utilization, field approvals, and gas-fired industrial heating equipment. He is a member of the Fuels & Appliances Strategic Steering Committee and recently took on the role of Chair of the Interprovincial Gas Advisory Committee. Sidney has also been a key contributor on the Canadian Advisory Council on Plumbing and has served in a leadership role for almost 12 years.

The quality of Sidney’s work, and his overall support for standards development, is simply outstanding. He is respected as a strong regulatory voice on CSA committees and is one of the most authoritative voices on plumbing matters in Canada. He is a problem solver, listens carefully, and exemplifies a collaborative attitude which is appreciated by his fellow members. He is truly a distinguished asset to CSA Group and the development of standards and codes.

Sidney is the Chief Plumbing and Gas Administrator, for the Alberta Municipal Affairs Safety Services.
