

CERTIFICATION Informs

An Urgent Bulletin from CSA Group

Ref No: I18-124

Concrete Products No. 17

Date: October 16, 2018

Existing Certification not affected

Apply any time to have your products evaluated

Announcing: Publication of Update No. 2 to CSA Standard A23.1-14/A23.2-14 – Concrete Materials and Methods of Concrete Construction / Test Methods and Standard Practices for Concrete

See Attachment 1 for affected Class Numbers.

To purchase the Standard, visit us at store.csagroup.org

Who is affected?

Manufacturers of pre-cast concrete products, circular manholes, concrete luminaire poles, concrete water cisterns, concrete septic tanks and concrete sewage holding tanks.

What do you do?

1. This publication outlines certification revisions that do not affect your currently certified product designs.
2. Please contact CSA technical staff if you have questions or need information concerning this publication and how it applies to you.
3. If you would like to arrange for an evaluation of new products to the revisions, initiate a certification project by contacting our Client Services Centre at 1-866-797-4272. Please supply appropriate supporting documentation*. If testing is needed, we will inform you of the samples required.

*which includes technical information, company name, address, factory locations and CSA file number or master contract number (if assigned), and any other relevant documentation.

Introduction:

CSA Group is announcing the publication of Update No. 2 to the twelfth edition of the CSA Standard A23.1-14/A23.2-14 – Concrete Materials and Methods of Concrete Construction / Test Methods and Standard Practices for Concrete.

The revisions included in this update have been formally approved by the Technical Committee, and are marked by the symbol delta (Δ) in the margin of the affected pages of the standard.

Major Revisions:

See attachment 2

ATTACHMENT 1

Affected Class Numbers

Class No:

3426 03, LUMINAIRES - Luminaire Poles

6921 01, PLUMBING FIXTURES - Septic and Sewage Holding Tanks for Plumbing Systems

6921 02, PLUMBING FIXTURES – Water Cisterns

6921 03, PLUMBING FIXTURES - Sewage Tanks for only structural sufficiency and water tightness to CSA B66 Standard

8083 04, PRECAST CONCRETE – Prequalified manufacturers of precast concrete products

8083 05, PRECAST CONCRETE – Reinforced Circular Manhole Sections and Catch Basins

8083 06, PRECAST CONCRETE – Reinforced Circular Manhole Sections and Catch Basins – Certified to ASTM Standards for Canada

ATTACHMENT 2

Major Revisions

Several changes have been made in this publication. Manufacturers are advised to refer particularly to the following:

- a) Introducing new Annex S (Concrete made with carbon dioxide as an additive), providing information about the use of limited amounts of carbon dioxide as an additive during concrete production;
- b) Clause 4.1.1.6.2 was revised to remove the additional restrictions & limitations that were required when Portland-limestone cement was used in the production of concrete subjected to sulphate exposure;
- c) Clause 6.8.5.1.2 was revised to require the design of falsework and re-shores to account for the post tensioning forces as supplied by the post-tensioning engineer in accordance with CSA S269.1-16 Standard; and
- d) Editorial corrections and changes in the following CSA A23.1-14 clauses and tables: Clause 3 and Tables 2, 3, 5 and 7.
