
Class No:3335 11 : SYSTEMS (GAS) - Flammable Vapor Sensor Systems and Components
3335 91 : SYSTEMS (GAS) - Flammable Vapor Sensor Systems and Components - Certified to U.S. Standards

Who is affected?
Manufacturers of flammable vapor sensors and systems intended for use in gas-burning appliances.

What do you do?
1. This publication outlines certification revisions that do not affect your currently certified product designs.
2. Please contact CSA engineering staff if you have questions or need information concerning this publication and how it applies to you.
3. If you would like to arrange for an evaluation of new products to the revisions, initiate a certification project by contacting our Client Services Centre at 1-866-797-4272. Please supply appropriate supporting documentation*. If testing is needed, we will inform you of the samples required.

*Technical information as well as company name, address, factory locations and CSA file number or master contract number (if assigned) when applying.

or e-mail john.skinner@csa-international.org

Approvals:
- Interprovincial Gas Advisory Council (IGAC) on September 14, 2007.
- The revisions in this standard supersede any corresponding provisions of ANSI Z21.94-2006•CSA 6.31-2006, and are identical to the coverage from the review and comment text dated July 2006, distributed during that period.

Major Revisions:
1. Revise 2.2, Flammable Vapor Sensitivity and Table VII to allow for ease of reference by the user of the standard.
2. Revise 2.3, Continued Performance, 2.4, Environmental Testing, 2.5, Vibration, 2.8, Accelerated Cumulative Chemical Exposure Test, 2.13, Transient Voltage and 2.14, Effects of Condensation, to remove redundant testing at ambient temperature and humidity requirements in 2.2.
3. Revise 2.8, Accelerated Cumulative Chemical Exposure Test, to reduce the overall testing time for chemical exposure test without compromising the intent or severity of the test.
