Strengthen Your Product Integrity in the Marketplace

Efficiency

Satisfy customer demands for independent third-party reviews and gain a competitive advantage in the marketplace with CSA Group's Qualified Test Facility Programs (QTFP).

These convenient solutions for organizations with in-house laboratories can save time and money on testing and certification, allowing manufacturers to conduct part or all of a testing program quickly and efficiently in their own facilities with an accredited certification body like CSA Group.

Safety

Product safety and data integrity are of utmost importance to us, so we are introducing changes to strengthen the value we bring to your organization through our Qualified Test Facility Programs.

We're upgrading our Category Program for Certification (CPC) to four mandatory audits per year and our Supervised Manufacturer's Testing Program for Certification (SMTC) to one mandatory audit per year combined with additional program requirements. Mandatory witness testing may also be required for new products under the SMTC.

Value

These visits are an opportunity to provide additional value-add services, including staff training, standards updates, and scope expansion.

Leverage the expertise of your certification staff to streamline your testing processes, improve your products, and ready your organization for upcoming changes to standards requirements. During these visits we can provide you with a Technical Information Service (TIS) to support your product development early in the design phase.

Enhanced Qualified Test Facility Programs Offer Value-Added Services

THE CSA GROUP DIFFERENCE

Rely on an internationally recognized company with over 100 years of expertise and knowledge. From our early beginnings developing standards for railway bridges to today's latest sustainable technologies, we're always looking forward and developing innovative standards and testing programs for the most advanced and emerging technologies. Drawing on our industry accreditations, our customer-focused experts can create custom solutions that meet your unique testing, inspection, and certification needs. That's how we're holding the future to a higher standard.

Training

Gain practical information from our technical experts on the latest testing protocols, industry trends, and relevant standards. Expand your organization's knowledge base and make the most of our visits by preparing your questions in advance.

01

Standards Updates

Learn about how your organization can prepare for new regulations, such as ISO/IEC 17025. The 2017 edition is mandatory if you want to use your own lab results for product certification and verification as of November 30, 2020.

02

TIS

Our Technical Information at the right stage of product design and production can help manufacturers save time and money. CSA Group's Technical Information Service (TIS) is designed to help you early in the product life cycle – before you commit to production. Our technical experts can clarify requirements in both North American and international standards, helping smooth the road to successful certification. Your TIS will be fully customizable and confidential. Sessions can be conducted on the phone, at our lab, or on-site at your facility. During this session, experts will guide you through the certification requirements that apply to your products.
