CERTIFICATION Notice

An Urgent Bulletin from CSA Group

Wiring Devices No. 134 | **Effective Date: December 31, 2021**

Date: January 24, 2020 | **Apply Before December 31, 2020**

Announcing: Publication of CSA Standard C22.2 No. 284-16, Nonindustrial photoelectric switches for lighting control (Tri-national standard with UL 773A and NMX-J-715-ANCE)

Class No: 6211 02, SWITCHES - Photoelectric for lighting control
6211 82, SWITCHES - Photoelectric for lighting control - Certified to US Standards

To purchase the Standard, visit us at store.csagroup.org

Who is affected?

Manufacturers of nonindustrial photoelectric switches for lighting control.

What do you do?

1. The revisions outlined in this Certification Notice will not require testing, but will require updates to your Certificate(s) of Compliance & Report(s). CSA Group Service Delivery staff will contact you to address compliance with each revision as applicable to the product designs covered in your affected Certification Reports.
2. Please respond within thirty (30) days of receiving CSA Group's "Application for CSA Certification Services" and "Quotation" communication. You must respond no later than December 31, 2020 in order to guarantee the update to your certification is completed by December 31, 2021.

Approvals:

This Notice announces the publication of CSA Standard C22.2 No. 284-16 (first edition) / UL773A (sixth Edition) / ANCE NMX-J-715 (first edition) Nonindustrial Photoelectric switches for lighting controls. This standard is issued jointly by ANCE, CSA Group, and UL. Photoelectric switches previously covered by Technical information letter (TIL) CSA A-15 are superseded by this standard. This also announces the withdrawal of Technical information letter (TIL) CSA A-15. Applications for certification can be made at any time.

Background and Rationale:

There are many types of photoelectric switches which are not covered completely by one safety standard. At the request of industry this standard was created for Nonindustrial type photoelectric switches. Switches currently certified under classes 3426 and 4652 must be moved to the new class numbers above and shall meet the marking requirements as stated. No further testing is deemed necessary however manufactures may take advantage of the new load types found in CSA C22.2 No. 248-16.

For questions specific to your file or products contact your CSA Group technical staff associate.
Go to https://www.csagroup.org/testing-certification/product-listing/ and enter your Master Contract # and the class numbers associated with this Notice to determine which of your products are affected.

or e-mail todd.hamden@csagroup.org

The standard edition or amendments announced in this Notice may be used for certification as of the date of issue of this Notice. The "Effective date" in this Notice is the date on which the current requirements, applicable to Certified products listed in the affected class numbers, expire and the standard edition or amendments announced in this Notice become the only requirements that may be used for certification.

In the event that currently certified products do not comply with the latest requirements outlined in this Notice after the "effective date", the certification of such models may be discontinued.
