

# CERTIFICATION Informs

An Urgent Bulletin from CSA Group

Ref No: I15-032

## Wiring Devices No.93

(Supersedes Electrical Certification Notice No. 516,  
TIL CSA I-11B, Ref No: N86-058)

**New Service available as of today**

Date: February 26, 2015

**Apply any time to have your products evaluated**

Announcing: Publication of CSA Standard C22.2 No 269.3-14, Surge protective devices - Type 3 - Cord connected, direct plug-in and receptacle type

See Attachment 1 for affected Class Numbers.

To purchase the Standard, visit us at [www.shop.csa.ca](http://www.shop.csa.ca)

### Who is affected?

Manufacturers of cord-connected, direct plug-in and receptacle type surge protective devices.

### What do you do?

1. This publication provides for new certification services that do not affect your currently certified product designs.
2. Please contact CSA technical staff if you have questions or need information concerning this publication and how it applies to you.
3. If you would like to take advantage of the new certification services, initiate a certification project by contacting our Client Services Centre at 1-866-797-4272. Please supply appropriate supporting documentation\* and we will inform you of the samples required.

\*which includes technical information, company name, address, factory locations and CSA file number or master contract number (if assigned), and any other relevant documentation.

### Introduction:

This announces the publication of CSA Standard C22.2 No. 269.3-14, Surge protective devices Type 3 - Cord connected direct plug-in and receptacle type. This standard is one in a series of standards dealing with surge protective devices (SPDs). CSA Standard C22.2 No. 269.3-14 covers cord-connected, direct plug-in and receptacle type SPDs whose primary function is to provide surge protection and that are intended to be marked as "SPD Type 3". Other standards in the C22.2 No. 269 series cover Surge protective devices for permanently connected products, component assemblies, and components.

With the publication of the entire C22.2 No. 269 series, these standards will supersede TIL I-11B Interim Certification requirements for surge/transient voltage suppressors which will be withdrawn.

### Approvals:

Wiring devices with surge protection currently certified to other standards are not required to re-apply unless the manufacturers would like to take advantage of this new standard and apply the marking "SPD Type 3" to their products

For questions specific to your file or products contact your CSA Group technical staff associate.

Go to <http://www.csagroup.org/us/en/services/testing-and-certification/certified-product-listing> and enter your Master Contract # and the class numbers associated with this Informs to view your certified products.
